PERSONAL PROFILE

Creative and results-driven software engineer with freelance experience building mobile apps that drive growth and inclusion. Strong ownership mindset and passion for solving user problems. Skilled at working end-to-end on Android software solutions across fintech, cybersecurity, and data-driven platforms.

PROFESSIONAL SKILLS

- Languages/Frameworks:** Kotlin, Java, Swift, Scala, Android Jetpack, Compose, Mockito, Spring Boot.
- Tools/Platforms:** Git, Firebase, AWS, Fastlane, CircleCI, Material Design UI/UX, Figma.
- Skills:** RESTful APIs, GraphQL, JSON, CI/CD, Backend Service Integration, Third party API and SDK integrations.
- Strengths:** Product collaboration, problem-solving, technical ownership, and creative design thinking

WORK EXPERIENCE

Mobile Engineer [Freelance Contracts]

2021-present

- Building a white-label, opt-in MDM solution for cyber security on the go.
- Onboarding new hires for mobile teams, owning and improving process and product documentation.
- Building and maintaining a data-driven mobile business management solution to aid growth for over 150k SMEs, providing them with data-driven insights into their business and access to loans.
- Improved scalability and build times by 24% by applying modularisation techniques to product feature implementations. Reduced app install size by introducing dynamic feature modules.
- Improved app retention and increased subscriptions by collaborating with product design and marketing to A/B test in-app welcome messages, unsubscribe/churn flows, feature onboarding and payments.
- Coordinated closely with product and design to define and execute the mobile roadmap, overseeing delivery, reviews, and technical direction.

Mobile App Developer, IT Consortium

2017-2021. Accra, Ghana

- Led the mobile development for a crowdfunding app solution (Chango) integrated with mobile money and card payment gateways.
- Built an e-commerce mobile application (Genpay) to conveniently make payments for various listed local goods and services via Ghana's mobile money platform.
- Accomplished a 15-20% reduction in application size across all Android app releases by refactoring the existing Java code base to Kotlin and replacing external third-party libraries with custom native solutions.
- Coordinated training and onboarding of new hires, overseeing delivery, reviews, and technical direction.

Software Developer Intern, BSystems Ltd

Summer 2017. Accra, Ghana

- Built and maintained a student management system that allowed for performance review and RFID cards integration.

Summer Intern, Volta River Authority

Summer 2016. Accra, Ghana

- Worked in the MIS Department to maintain their ERP solution using Oracle 11g.

PERSONAL PROJECTS

- Portfolio web app: Showcase product portfolio on the web
- Portfolio mobile app: Showcase multiplatform app architecture using KMP
